Electric Float BAPRO EASY

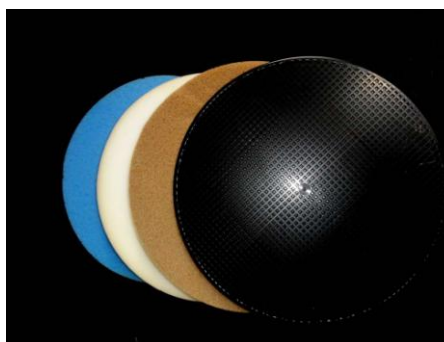

In carrying out the finishing work the huge importance has productivity. So far, work is carried out manually the treatment of plaster can now be replaced with highly efficient **BAPRO EASY** electric finishing plaster machine. It's very easy to use device affects not only the smooth running of the work but the end result appears trowelled plaster. The finishing plaster machine consists of two components: cover and the drive. The cover contains feet stable, convenient handle for transport and a 5-liter water tank. The front panel contains the main electrical connection and main switch controller machine which precisely set the optimal speed mashig and connect the drive with a trowel quick-feed water. Water is taken from the reservoir through water pump with filter system thus eliminating the possibility clogging of the nozzle. Pumped by cable directly to the drive. The handle has a button ON and OFF as well the washer and the oblique sprinkler nozzles for humidification. The optimum speed of mashing plaster is achieved through the liquid drive speed control dial. Disc diameter is 40 cm with the exchangeable accessories (velcro). The equipment enters into the composition of PVC discinital scuffing and free sponges varying hardness. Items are rapidly mountable after the solid velcro. To ensure the sage transport of equipment, the standard unit has closed light box with handles. The great advantage of it is power to 230V, small size and weight. As you can see finishing plaster **BAPRO EASY** this is another step towards improving the efficiency work! Try and convince yourself how much gain in productivity!

EQUIPMENT

- pre-mashing PVC disc with velcro
- brown sponge with velcro
- creamy sponge with vecro
- blue sponge with velcro
- plastic box with handles
- safety glasses

SPECIFICATIONS

- drive 0,8kW 230V 50Hz
- 5 liter water thank with pump and filter
- disc diameter 40 cm
- cable length 15 m
- speed control
- moisturizing by water nozzle

TECHNICAL DATA

- dimensions H/W/L 36cm/30cm/45cm
- weight of the drive 5kg
- base weight 15kg
- total weight 30kg
