A new Polish cosmetics brand in
Canada

2019-01-08 20:22:16

The Polish manufacturer of natural cosmetics for face, body and hair care Clochee has partnered with the Canadian distributor Les Boutiquiers Apotikaire Inc.

[Clochee](#) are made of 100% natural and organic ingredients and do not contain parabens, silicones, artificial flavors or dyes. The company uses only certified plant-derived raw materials in its products, which are not tested on animals. There are also zoonotic substances free, which is why they are suitable for vegans and vegetarians. The strength of Clochee is not only excellent efficiency, but also the quality of cosmetics. The effectiveness of Clochee products is confirmed by numerous awards of leading Polish magazines for women. Apart from providing healthy products, the company's mission is also to sell them in an environmentally-friendly packaging made of 100% recyclable materials and suitable for recycling. Clochee was the first cosmetics company in Poland to use d2w® additive, which converts everyday plastic products (made from PE, or PP) at the end of their useful life in the presence of oxygen into materials which degrade, and then biodegrade in the open environment in the same way as a leaf and leaving nothing behind - no toxic residues or fragments of plastic.

In the future, the company intends to continue its development on the Canadian cosmetics market. Clochee also exports its products to the Arab Emirates, most of Western Europe and several Asian countries.
