Trade Fair For Technical Textiles -
Conference InnovaTex 2016

2016-06-06 14:54:54

Trade Fair For Technical Textiles is a branch project aimed to the manufacturers and purchasers of technical and special-purpose textiles. Our event is the most important meeting with representatives of the textile industry in Poland.

Technical textiles become a major and growing sector which supports a vast array of other industries. Technical textiles include textiles for automotive applications, medical textiles (e.g., implants), geotextiles, agrotextiles (e.g., textiles for crop protection) and protective clothing (e.g. heat and radiation protection for fire fighter clothing). Nowadays the most widely technical textile materials are used in filter clothing, furniture, hygiene medicals and construction materials.

Trade Fair For Technical Textiles is a branch project aimed to the manufacturers and purchasers of technical and special-purpose textiles. Our event is the most important meeting with representatives of the textile industry in Poland. The main purpose of the fair is to strengthening and intensify the co-operation between business and scientific circles and promotion of modern textile technology, which are increasingly being used in many industries.

In parallel with the exhibition INNOVATEX Technical and Special Purpose of Textiles Conference will be held. The main target of the INNOVATEX 2016 is to create an opportunity to exchange knowledge for scientists, manufacturers and users of technical and specialpurpose textiles in different industries. It will also be a platform for sharing experience as well as a source of the new ideas born at the meeting point of interdisciplinary fields of knowledge.
