

“The growing number of exhibitors at the NAMPO Agricultural Trade Show can be attributed to a number of factors. Foremost is the positive sales reaction experienced at the Show. The unique demonstration programme that allows interactive demonstrations on stands in addition to the static exhibits.

All known sectors of the agricultural input suppliers are represented. These range from tractors and implement manufacturers, the chemical industry, fertiliser companies, financial institutions to feed manufacturers, extension services as well as commercial sectors, agricultural co-operatives and utilities such as Eskom, the national electricity supplier.

Several other industries, not related to agriculture, exhibit their products albeit in limited numbers. Because of the diversified nature of summer grain farming the livestock industry is very well represented. In total 31 breeds of cattle, 10 breeds of sheep as well as 3 breeds of horses and 6 breeds of goats are exhibited.

Over the last number of years, various international exhibitors from countries such as Australia, Sweden, USA, Britain, Italy, Pakistan, Germany and Brazil also took part in the show.

Exhibitor's Profile:	All agricultural input suppliers including agricultural machinery, irrigation, chemical, transport, fertiliser and seed, extension services, commercial sectors, utilities, feed manufacturers, financial institutions and livestock breeders.
