# LOCATION OF POLAND

Poland is located in the centre of Europe, and this factor alone demonstrates the great potential of our country. Poland borders Germany to the west, the Czech Republic and Slovakia to the south and Ukraine, Belarus and a bit of Lithuania to the east. A small, separate fragment of Russia known as Kaliningrad Oblast also borders part of Poland to the north. The rest of the northern border comprises the golden beaches of the Baltic Sea. The capital of Poland is Warsaw (Warszawa), located almost in the centre of the country.

# POLISH EXPORT HITS

Poland is a leading manufacturer of automotive and aviation parts in the world. It is estimated that every car and every airplane has at least one part produced by Polish companies. Broad experience, excellent quality, innovative machines, highly specialised personnel, low production costs and high flexibility are still significant competitive advantages of domestic manufacturers.

# CAR PARTS - DRIVING FACTORS OF POLISH ECONOMY

In 2017, foreign sales of the automotive industry in Poland increased to 25.2 bn euro. The run of good luck of the automotive industry is all to do with the increasing production of automotive parts and components. In 2017, Polish supplies to foreign car factories exceeded 11.2 bn euro. The Polish automotive industry in 2016 employed 174.2 thousand workers, i.e. 10% of people employed in the industry.

**The biggest export hits are:**  
vehicle bodies (including those for special fire brigade vehicles or ambulances), electric buses, semi-trailers, batteries. There are a lot of companies in Poland that deal with the production of plastic interior and exterior elements, metalworking or the production of rubber elements.

# AUTOMOTIVE IN FIGURES

# FUTURE OF POLISH FLYING

The aviation parts market is developing in Poland as dynamically as the automotive parts and components market. In Poland the following, among others, are manufactured: aircraft engines and their modules, helicopters, training aircraft, ultralight or unmanned aircraft. For example, the value of the drone market in Poland in 2016 was estimated at PLN 201.31 mn, which means an increase by 22.75 % compared to 2015 (PLN 164 mn). It is estimated that the value of this sector may increase to nearly PLN 10 bn within next 10 years.
