

Look Food Group is a major food producer and distributor in Central Europe. We have been operating with passion for over 20 years. Thanks to many years of experience, knowledge and care for the production process, we are growing dynamically creating products of the highest quality.

We offer juice concentrates, in particular raspberry, which we specialise in, and cranberry, blackcurrant and blackberry juice concentrates. We produce concentrates of other juices at the request depending on the availability of raw material.

We offer the lowest price on the market and its guarantee and constant availability throughout all months of the year. We are able to supply up to 500 tonnes of concentrate per month.

We also export cooking oils (sunflower and rapeseed). We offer all raw materials in industrial quantities.

What distinguishes us from other suppliers is our approach to customers and their requirements. We are happy to adapt the product to the customer's needs and specifications.

Our guiding principles are: flexibility, promptness of action and looking for solutions leading to the completion of the transaction in accordance with the customer's expectations.
