MODERN

wall decorations

Lamellas for walls and ceiling.
Acoustic panels. Free-standing walls.
Skirting boards. Milled panels.

COLLECTION
2022/23

Design delivered right to your home.

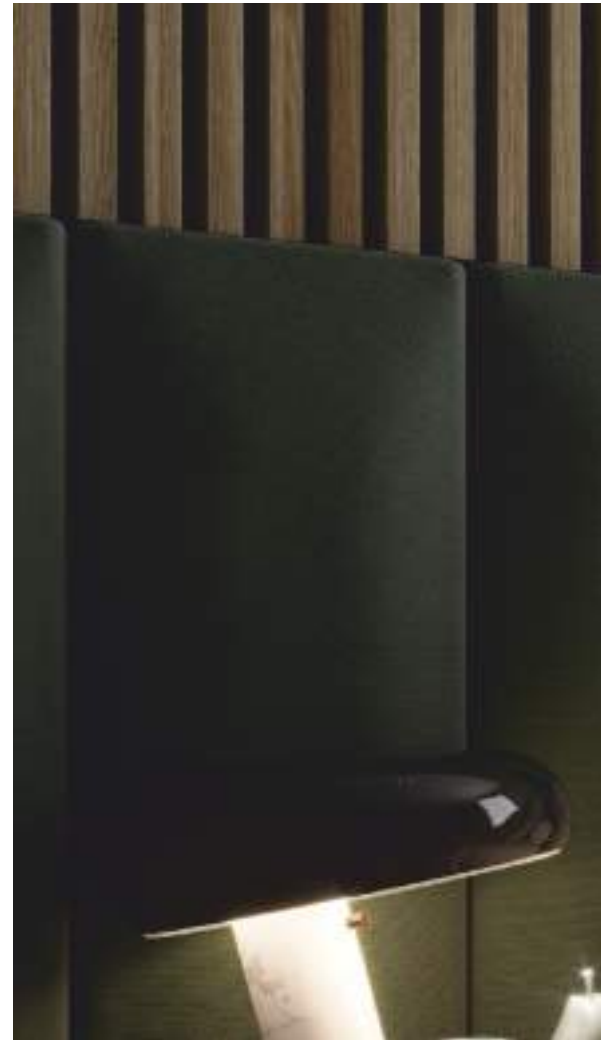

Add personality to the interior.

Form, texture and color - from these three components we create wall decorations that transform the interiors in which we live.

A design for a house or apartment that does not succumb to passing trends is possible. It requires, however, taking into consideration several design elements. One of them is wood, which provides a warm climate and nature to the interior.

LAMELE3D designs and manufactures unique, creative and easy to install wall and ceiling solutions. Thanks to the high quality materials used during production process aesthetics is combined with functionality.

Implementation of wall lamellas creates an optical illusion and affects the appearance of the room, which gains a new, harmonious proportions.

Intemperance in form and color.

No bonds at the edges

Lamellas.
30x40x2750mm

Inspired by nature.

Lamellas are the best proof that nature is a wonderful, inexhaustible and every time unique Inspiration. Minimal form and maximum structure are the distinguishing features of our oak veneer slats. Thanks to their texture they are pleasant to the touch and the unique wood grains give them an original aesthetic. The surface of the lamellas is additionally protected with natural oil-wax.

Simplicity and functionality.

We introduced a solution that maximizes the simplicity of installation and the durability of the decoration. Perfectly even gaps are a recipe for geometrical success.
