

**NOTER**

**TOBO**

Noter is a furniture system which allows for easier cooperation, very important in modern offices and home office arrangements. The accessories include cushions to make sitting together more comfortable. The upholstered elements are made to order from fabrics available from the largest office chair manufacturers, allowing the details to match the colours of the chairs.

The Noter collection offers a wide range of furniture units allowing you to furnish both single and double workstations. The desks are divided by partitions with pin boards, additionally equipped with metal containers helping to organize the workplace.

The simple form of the furniture and the modularity of the units allows you to uniquely arrange an optimal work space for each user.

Minimalist style: simplicity of form, handleless opening make the furniture timeless and its design will never become obsolete.

Noter is also distinguished by a rich variety of materials and colours. In desks you can choose from two types of frames in several colours, as well as tops made of laminated board or lacobel glass glued to the board.

In the pedestals the matt, wood-like laminated board has been combined with fronts made of glossy acrylic board. Acrylic also appears in the options for desk covers.

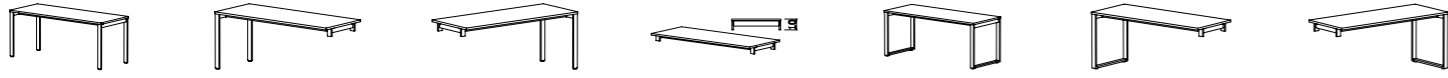

Noter system is modern furniture, which through its light and elegant form will also find a place in simple offices as well as home interiors.

The drawers of the desks are equipped with functional organizers which allow you to manage the surface. Additionally, each desk is equipped with a pull-out pencil case, which makes work organisation much easier.
