Carport is an innovative solution for street furniture and an attractive alternative to classic ground installations. A covering made entirely of photovoltaic modules creates a roof for a car and thus saves the space that would be required for a standard PV installation.

- ✓ We provide a 10-year warranty for each structure
- ✓ possibility of installing any photovoltaic module
- ✓ use of parking spaces for PV
- ✓ flexibility in the number of stations, multiple of 1/2 station--All structures are made in our factory in accordance with applicable standards PN-EN 1090-1+A1:2012 on requirements for steel structures

modular system

parking place: as required

length: 6 m

angle : 11°

module orientation: Vertical

number of modules: multiple 9

width: depending on the number of modules

assembly to: foundation / foundation screw

number of rows: 3

module height: from 1670 to 2290 mm

module width: from 990 to 1150 mm

sheathing: module, trapezoidal sheet

material: structural steel S350

powłoka: hot-dip galvanized
