

Time for good beer

2024

Browar Witnica was established in 1848. For over 170 years, it has remained in the same location, right in the center of the city.

As the sole beer producer in the region, it continues the brewing traditions of the Lubusz Land, crafting its beers with the artistry of using natural ingredients and traditional recipes. Open-tank fermentation and extended aging contribute to Browar Witnica's beers being distinguished by their unique, one-of-a-kind flavor and aroma.

The quality of our products is not only appreciated by consumers but also by numerous judging panels in beer competitions in Poland and abroad, where Lubuskie brand beers receive numerous awards and medals. We are a member of the Association of Polish Regional Breweries, which only admits breweries adhering to the Code of Good Beer, ensuring consumers that beer is crafted according to traditional brewing principles, without the use of artificial techniques or chemical additives to speed up the process.

Our brewery's beers are listed on the Register of Traditional Products maintained by the Minister of Agriculture and Rural Development. Our range of products is extensive, so everyone is sure to find a beer they enjoy and perhaps even fall in love with.

For those who want to experience the atmosphere of our brewery and discover the secrets of beer brewing, we invite you to visit the Lubusz Brewery Museum. The museum tour includes a presentation of the entire brewing process (mashing, fermentation, aging, filtration, pasteurization, bottling) and a tasting of Lubuskie Beers. We encourage you to indulge in the pleasure of tasting and the delightful experience of exploring the Flavors of Lubuskie!"
