

Get to know us better!

We design, optimize, and implement **complete shot blasting and surface treatment processes** – fully tailored to the client's production goals and conditions.

 alumetal-technik.com

How much does shot blasting really cost?

6 factors that drain your budget

Electrical energy

High power consumption by blasting turbines

Labour costs

Operator working time and manual handling

Service and spare parts

Maintenance and replacement of blasting machine components

Waste disposal

Removal of abrasive dust and other waste materials

Abrasive quality and consumption

Frequent replenishment and contamination of media

Process organization

Inefficient planning and logistics

PRODUCTS – METALLIC ABRASIVES

VERA® steel shot

DIAMANT grit

Steel shot

Steel grit

Cast iron shot (spherical)

Cast iron shot (ballast)

Cast iron grit (angular)

SPAJIC® cut wire shot

PRODUCTS – MINERAL ABRASIVES

Glass beads (microbeads)

Glass grit

Glass powder

Brown corundum

White corundum

ECO corundum

PRODUCTS – MACHINES AND PARTS

TZNZ overhead rail wheel blast machines

TZ overhead rail wheel blast machines

TZZS table and overhead combined wheel blast machines

TZS table-type wheel blast machines

TZB drum-type wheel blast machines

TZNP through-feed wheel blast machines

Sandblasting cabin

Blades, turbines, and other parts

PRODUCTS AND SERVICES – ADD-ONS

SP-Unit

Sorbent Protector

Spare parts

Removal of oil from abrasive

Service

Technical consulting
