

Textiles and Waste electrical and electronic equipment collection container.

A container with visual features of the well-known Classic 2 GS with additional functionality of bottom unloading system. Unloading is carried out using an HDS crane.

Product features

- Bottom unloading system that makes the unloading process much more easier.
- Unloading is carried out using an HDS crane.
- Small roofs prevent rain from leaking into the container.
- Possibility to install SLIDE and SELF mechanism of deposit flap.
- SELF mechanism supported by gas springs ensures automatic lifting the flap to the closed position.
- Comfortable handle made of a pipe in case of SELF mechanism.
- Gas springs supporting the flap ensure its slow and smooth movement.
- Dimensions according to EN 840-6 and EN 13071 Standard.
- Total elimination of welding joints on galvanized steel.
- Surface without rivets to facilitate applying graphics.
- Adjustable feet made of durable plastic.

Anti-corrosion protection

Galvanized sheet metal and powder coating perfectly protect the container against weather conditions. Additional profiles and accessories are hot-dip galvanized.
