GAME TRAILERS AND CINEMATICS

We believe that a good story and perfect execution are crucial to keeping players engrossed. We bring fantasy creatures, human characters, vehicles, environments and even props to life. We can recreate photorealistic characters and events, or wildly fantastical cartoon creations and every step in between. Huge simulations of ice, snow, fire, will be broken down into components and merged together upon completion to give a fully realized and believable end result.

SERVICES INCLUDE

- Character & Creature design
- Modeling
- Rigging
- 3D & 2D Animation
- Motion Capture
- Performance Capture

- Direction

SCANNING

Our in-house OOBE3D scanner consists of 150 cameras and additional powerful constant lighting. The cameras are located 360 degrees in a cylindrical volume. To get more accurate geometry, images are taken with lightmarkers, and for high-quality texture taken additional images with a difference of 1/30 second. The total capacity of the scanner is 2142 megapixels and allows you to receive and transmit information for processing up to 20 models in 30 minutes.
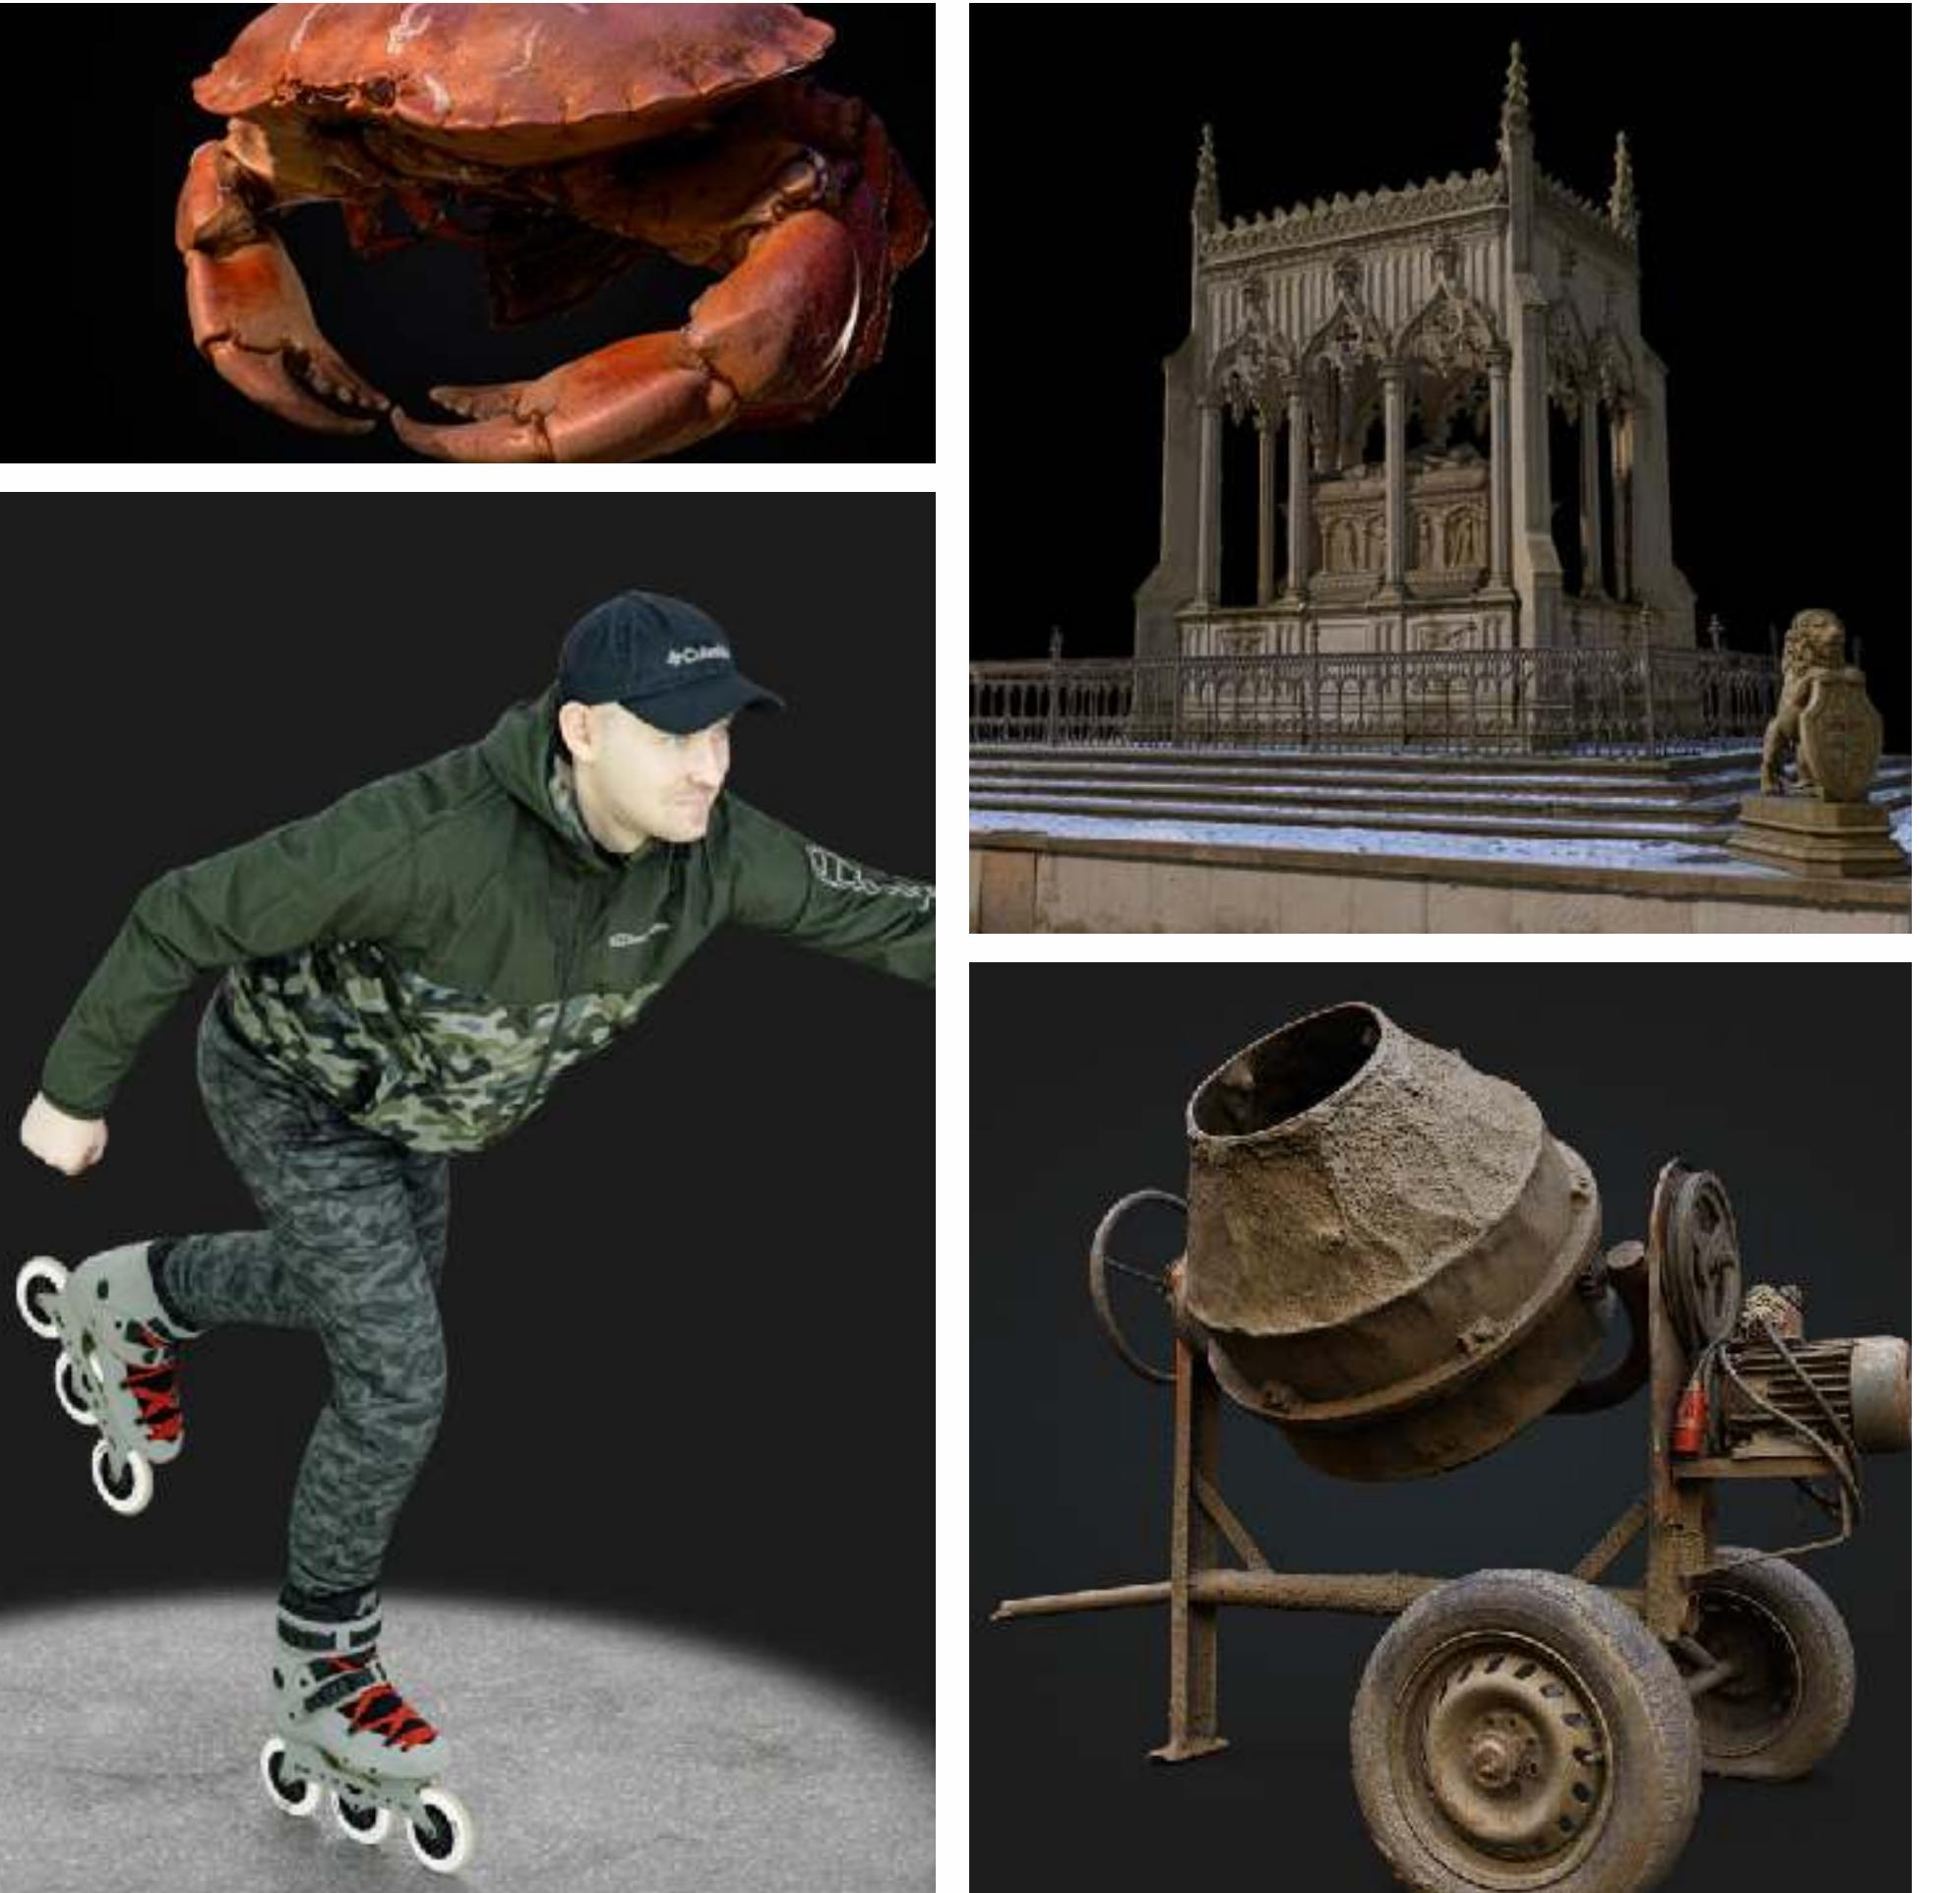

SERVICES INCLUDE

- Full Body Scanning
- Large Scale Environment and On-Set Scanning
- Prop and Asset Scanning
